

A red Victor FSX battery burnisher is shown in the background, partially obscured by text. A smaller, clearer image of the machine is shown in the foreground on the right side. The machine has a black handle and a red body with 'FSX' written on it. The background is white with a large black and red arrow pointing downwards on the right side.

## Victor FSX

### For Daytime Cleaning

#### **Daytime Cleaning**

The Victor FSX battery burnisher has no trailing power leads allowing safe cleaning at any time of day.

#### **Onboard Charger**

The FSX contains an onboard battery charger that can simply be plugged into the nearest socket to start charging. The batteries can be fully recharged from empty to be ready for their next use in eight hours.

#### **Spray Attachment Available**

The optional spray attachment allows the machine to be used for light spray cleaning and burnishing when used with Victor Sunbeam Neutral Floor Maintainer.

#### **Gel batteries for safety**

The FSX utilises high technology gel batteries, ensuring no danger of battery leakage and safety in charging and transportation.

#### **Battery level indicator**

The battery level indicator uses a simple colour system to indicate how much charge the battery contains and when it needs charging.

#### **Isolation key to prevent tampering**

The isolation key operates as an extra layer of safety stopping the machine being turned on whilst not in use and preventing tampering or use by unauthorised operatives.

The Victor FSX Freestyle battery burnisher offers ultra speed burnishing, excellent battery performance and a flexible drive board to work with the contours in the floor.

## Technical Data

Product Code	VR-BB450
Voltage	24 v
Run Time	2 hrs
Battery Charge Time	8 hrs
Battery Capacity	60 Ah
Battery Type	12 v
Rated Power	300 W
Noise Level	60 dBA
Pad Size	450 mm
Pad Pressure / rpm	3 kg / 1000rpm
Weight with Batteries	65.4 kg
Length	770 mm
Width	490 mm
Height	390 mm
Charger	10 amp on board

With more areas in use 24 hours a day, seven days a week such as hospitals and retail environments, the need for round the clock cleaning has increased. Machines that offer safe cleaning without trailing power leads are increasingly important. Impressively designed and dramatically different in its appearance, the FSX battery burnisher offers two hours operating time with a recharge time of just 8 hours. A unique on-board battery charger allows the operative to recharge the battery by plugging straight into the nearest electrical socket.

On board electronics protect the machine's batteries and motor from misuse and always ensure that there is enough charge in the batteries to protect them from damage to charge safely. Furthermore, when used on particularly uneven or sticky floors the electronics slow the motor down to a safe level to avoid damage.
