

A large, industrial-grade carpet cleaning machine, the Victor SX15, is shown in a light grey and red color scheme. The machine has a large, rounded body with a prominent red section on the right side. It features a handle on top and a large tank on the back. The Victor logo is visible on the red section. The machine is positioned on a white background, and a large red arrow points downwards from the top right corner of the page towards the machine.

SX15

Deep Cleaning of Carpets

Independent functionality

The solution spray, brush and vacuum functions can all be controlled individually to allow the operators to tailor cleaning activity to any particular situation. The spray feature can be used to pre-spray a carpet. Using the brush and spray function will scrub the solution or pre-spray into the carpet, particularly helpful on very dirty carpets. The vacuum can be used on its own for dry passes over the carpet to remove excess moisture and speed drying. Using the brush, spray and vacuum functions together gives a deep clean to any carpet that is quick drying.

Wand and Upholstery tool

The SX15 can be fitted with a hose and wand or upholstery tool for cleaning smaller areas, stairs and upholstery. This option maximises the flexibility of the SX15.

Separate Solution and Recovery Tanks

The SX15 has separate solution and recovery tanks to avoid the leaking of dirty recovered material into the clean solution associated with a membrane type tank system. The recovery tank can be easily removed for emptying.

Removable brush

The brush on the SX15 is easy to remove and replace to allow quick cleaning of both the brush and its housing to ensure great results and long machine life.

Dump Hose for easy emptying and solution level indication

The SX-15 has a dump hose fitted to the back that allows complete emptying of the solution tank. The solution dump hose also doubles as a solution level indicator.

The SX15 offers the capability to deep clean carpets and using the optional tool kit the ability to clean smaller areas, stairs and upholstery.

Technical Data	
Product Code	V-SX15
Voltage (V)	240
Motor Power (Watts)	1000
Brush Speed (rpm)	1000
Brush Length (mm)	295
Operating Down Force (kg)	2.2
Waterlift (mm)	2400
Airflow (l/s)	52.8
Noise Level (dBA)	76
Pump (bar / psi)	3.4 / 50
Weight (kg)	24
Solution Tank Capacity (litres)	15
Recovery Tank Capacity (litres)	15
Cable Length (m)	12
Dimensions LxWxH (mm)	570x380x710
Drying Width (mm)	380

Whether its a large or small area, stairs or upholstery the SX15 is the machine to provide a deep clean. Utilising the power of the solution spray that is agitated deep into the carpet pile by the chevron bristled brush, the SX15 cleans carpets effectively. The powerful vacuum then removes the solution and dirt from the carpet depositing it into the recovery tank for easy emptying.

The SX15 is easy to keep clean through the removable brush and filter inside the solution tank ensuring your SX15 is kept in optimal condition. The large rear wheels make the machine simple to move either up and down stairs or across uneven surfaces so that where necessary it can be moved easily between buildings. The fold over handle enables the machine to be stored in small cupboards.
