

A large, semi-transparent image of the Victor SD40 floor scrubber drier is shown in the background. The machine is primarily red and grey, with a large solution tank on top and a recovery tank below. A squeegee is visible at the front. The machine is positioned on a light-colored floor. In the top right corner, there is a black rectangular area with a red downward-pointing triangle at its bottom edge. The Victor logo is in the top left, and the product name 'SD40' and features 'Advanced Scrubbing and Drying' are in the top right. The main text is on the left, and a smaller image of the machine is on the right. The bottom of the page features the Victor logo, the slogan 'The Floor Care People', and the website and phone number.

SD40

Advanced Scrubbing and Drying

Unique Pre-programmable controls

The SD40 makes use of a simple to use soft touch programmable display that allows the user to select how much solution they wish to use and control the brush and vacuum functions independently. This means that the SD40 can effectively pre-scrub a particularly dirty floor using just the solution and brush. It can also be used just as a wet pick-up by only activating the vacuum. Furthermore, if you connect the clean solution dump hose to the vacuum hose and activate the vacuum, the solution is sucked into the recovery tank, helping to clean the inside of the recovery tank whilst emptying the solution tank.

Quick change Squeegee

The quick change squeegee cartridge puts an end to changing rubbers. Simply remove the old cartridge, recycle it and replace it with a new one. No tools necessary so it keeps downtime to a minimum.

Highly Manoeuvrable

The short wheel base allows the machine to be turned around its axis. The parabolic squeegee ensures that the SD40 doesn't miss a drop of water during the tightest of turns. It will even fit through a standard doorway.

Large Capacity Mains Scrubber Drier

40-litre solution and 50-litre recovery tanks together with a cleaning width of 500 mm make this a very effective scrubber drier.

The SD40 offers exceptional cleaning performance whilst keeping the operator in full control through the innovative touch screen control panel.

Technical Data	
Product Code	V-SD40
Productivity (m ² /hr)	750
Voltage (V)	240
Motor Power (Watts)	Vac: 1150 Brush: 1000
Brush Motor Speed (rpm)	180
Brush Diameter (mm)	500
Operating Downforce (kg)	35
Waterlift (mm)	2500
Noise Level (dBA)	76
Weight when empty (kg)	73
Solution Tank Capacity (litres)	40
Recovery Tank Capacity (litres)	50
Cable Length (m)	24
Dimensions LxWxH (mm)	1000x570x1100
Drying Width (mm)	750

The simple to use pictorial control panel makes training a new operator quick and easy. There are no visible moving parts making it safe for operators to use. The splash skirt acts both as protection against objects getting caught in the brush drive mechanism, and also avoids splashes from the solution being agitated by the brush.

The SD40 provides 35 kg of down force delivering a very heavy duty scrubbing action that will remove the toughest of dirt from the most demanding of floors. The SD40 can be fitted with either a scrubbing brush or pad drive depending on the floor type and condition.

All the functions can be controlled independently allowing greater flexibility in your cleaning routine to maximise results. A pre-scrub can be carried out by activating only the solution and the brush, giving the chemical increased reaction time to remove more dirt during the regular passes with the vacuum running.
