

SD30 SCRUBBER DRYER

Compact 30l Walk Behind

The SD30 is the "big sister" to the SD12, featuring a 30-litre solution tank and a 50 cm cleaning path. It's simple and lightweight, thanks to its Lithium Battery, and includes HEPA H13 filtration as standard.

The SD30 is easy to handle, compact, and fits perfectly in wide areas. It can clean close to walls in both directions and has a foldable, height-extendable handle. The new PCB allows operators to adjust cleaning power, vacuum power, and solution flow.

The patented design ensures low energy consumption with one motor driving two brushes, and a designated motor for the wet pick up ensuring a clean, dry floor. The brushes are held on with magnets for a quick, tool free brush change. The SD30 has a working width of 508 mm, a fresh/waste water tank capacity of 30/32 litres, and a brush speed of 290 RPM.

✓ High performance cleaning

High rotation double brush cleans better than single brush machines.

✓ Compact design

With the same tank capacity, Victor scrubber dryers are some of the shortest, narrowest and lightest options available.

✓ Simple, but built to last

Easy access to routine maintenance parts

✓ Easy to Use

Simple controls mean less training is required.

✓ Quick Charge & Long Runtime

✓ Maintenance packages available on request

Code	Description
V-SD5030	30l Walk Behind Scrubber Dryer

Key features

Front-mounted Double Brush

The SD30's patented 2 brush design is powered by a single motor which offers superior cleaning power.

Extra Quiet

Powered by a single motor that drives two brushes and the suction turbine, the SD30 creates just 66 decibels of sound.

Super Slimline

With the same capacity and track, the SD30 is one of the lightest (69kg) and most slimline 30L scrubber dryers available.

Quick Charge Batteries

With runtime of up to 2 hours and a recharge time of just 4 hours, the SD30 has the ability to be in action 8 of 24 hours.
